PROFESSIONAL SUMMARY

Full-Stack Software Developer with nearly 2 years of professional experience building and maintaining production-grade web applications using JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, and SQL, within Agile development environments. Experienced in developing scalable frontend and backend systems, integrating REST APIs, resolving production issues, and delivering business-focused solutions. Passionate about writing clean, maintainable code and building software that solves real-world business problems.

EDUCATION

University of Technology, Jaipur

Bachelor of Computer Applications (BCA), Computer Science

Relevant Coursework: Database Management Systems, Object-Oriented Programming, Software Engineering, Web Development, REST API Development

August 2024 - July 2027

Jaipur, Rajasthan

EXPERIENCE

Hatim Technologies

Full-Stack Developer

October 2025 - Present

Remote (HQ: Bengaluru, India)

- Develop and maintain production web applications using Next.js, React.js, Node.js, Express.js, and MongoDB in an Agile team environment.
- Build scalable, reusable frontend interfaces and backend services that streamline business workflows.
- Design and integrate REST APIs across multiple application modules, improving data flow between systems.
- Diagnose and resolve production issues, reducing downtime and improving overall application performance.
- Collaborate with designers, QA engineers, and product teams during sprint planning and reviews to deliver reliable software on schedule.

Hamari Dairy

Junior Software Developer

September 2024 - September 2025

Jaipur, Rajasthan

- Developed frontend and backend features for production applications, improving usability and reliability.
- Built responsive, cross-device user interfaces using React.js and JavaScript.
- Developed backend APIs using Node.js and Express.js, and optimized SQL database queries to manage business data more efficiently.
- Collaborated with senior developers in an Agile workflow to implement features and resolve production issues faster.

PROJECTS

BetSea Gaming Platform

Next.js, React.js, Node.js, Express.js, MongoDB, REST APIs | Live: <http://ph.betsea.net>

- Developed production-level frontend and backend features for a live, user-facing online gaming platform.
- Built and integrated REST APIs across multiple application modules, improving reliability of core platform data flows using MongoDB.
- Identified and fixed production bugs, optimizing application performance and contributing to smooth live deployments.

Hamari Dairy

React.js, Node.js, Express.js, SQL | Live: <https://hamaridairy.com>

- Developed frontend and backend modules for business operations.
- Built REST APIs, integrated SQL database functionality, and resolved production issues.
- Worked closely with business teams to deliver production-ready features.

Invoice Management System (Confidential Client)

React.js, JavaScript, SQL

- Developed frontend modules for an internal invoice management system, including responsive dashboards and reusable UI components.
- Integrated frontend with backend APIs and improved user experience and business workflows.

TECHNICAL SKILLS

Languages: JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Visual Studio Code

Concepts: REST APIs, Authentication, Responsive Design, Performance Optimization, Agile/Scrum Methodology
